

GRANGEX opens trading on Nasdaq on Monday 16 December

GRANGEX has had a fantastic 2024 with several milestones in our development. The most prominent ones are of course the acquisition of the Sydvaranger mine in Kirkenes, Norway, and the updated feasibility study for the Dannemora mine.

In order to strengthen GRANGEX as an investment object for both Swedish and international investors and improve the visibility of our share, we are now taking an important step by listing GRANGEX on Nasdaq First North Premier GM. The change of listing is a key for the upcoming financing required to successfully restart the mines in Sydvaranger and Dannemora.

On Monday 16 December at 09.00 we will ring the bell at Nasdaq!

About Us

GRANGEX is a Swedish mineral development company with the vision to actively contribute to a sustainable society within Europe. The company strives to become the foremost mineral development group in Europe, developing and conducting responsible extraction and recycling of minerals, primarily iron ore products and other critical minerals for the green transition. Through its products, GRANGEX will contribute to a reduced climate impact while minimising its own environmental and climate impact.

The company's share (short name GRANGX) is traded on NGM Nordic SME.
