

The Isle of Wight NHS Trust has chosen Ortivus' solutions to support their Ambulance Service ePR

Ortivus UK Ltd has now signed a contract with The Isle of Wight NHS Trust for the supply of MobiMed ePR to all frontline vehicles in their ambulance organization. The delivery value is estimated to be £376,000 GBP (4,587,200 MSEK) and the contract duration is 3 years, with a possible extension of 1 year.

Ortivus UK Ltd is proud to be supplying our MobiMed electronic Patient Record (ePR) system to Isle of Wight Ambulance Service. The island is home to 142,000 people and is served by the only fully integrated care NHS Trust in the UK covering acute, community, mental health and Ambulance health care.

"This partnership demonstrates our long-term relationship with Ambulance Services within the South of England, and we look forward to developing our services further with this key partner." Says Antony Holmes, Director Ortivus UK & Ireland.

"The Isle of Wight Ambulance Service are pleased to be working with Ortivus on the journey towards the next generation of electronic patient care records and we are confident that using MobiMed will have a positive effect on many areas of the service we deliver. We are certain that Ortivus' MobiMed ePR system will help us continue our journey for transforming our digital systems and will offer our staff and patients an improved experience and improved work environment" Says Victoria White, Head of Ambulance The Isle of Wight NHS Trust

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12 000 paramedics in over 2 700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 2.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
