The information was submitted for publication, through the agency of the contact person set out above, at 07:45 CET, on March 5, 2025.

About Isofol Medical AB (publ)

Isofol Medical AB (publ) works to improve the prognosis for patients with severe forms of cancer. The company's drug candidate arfolitixorin aims to increase the efficacy of first-line standard treatments for several forms of solid tumors and is currently being studied in colorectal cancer, the world's third most common cancer, where the medical need for better treatments is urgent. A phase Ib/II study is now being conducted with new dosage regimens that are expected to optimize the effect of the drug candidate. Isofol Medical AB (publ) is traded on Nasdaq Stockholm.
