

Eiendoms kreditt selects Knowit and Mambu to modernise its core banking platform

Eiendoms kreditt has selected Knowit and Mambu to modernise its core banking platform, marking an important milestone in the company's continued digital transformation. The new solution, powered by Mambu's cloud-native core banking technology and seamlessly integrated through Knowit's BankConnect platform, will replace the existing solution and provide a modern, flexible and future-ready foundation for mortgage lending.

Eiendoms kreditt AS is a specialised financial services provider offering commercial real estate lending across Norway. To support future growth and evolving market requirements, Eiendoms kreditt requires a modern core banking platform capable of delivering increased flexibility, scalability and operational efficiency.

The new solution will streamline processes related to loan origination, product configuration, credit handling and portfolio management, while improving data quality and enabling better real-time insight. These improvements will support Eiendoms kreditt's ambition to deliver efficient, compliant and customer-oriented lending services.

Knowit will act as the main contracting partner and system integrator for the project, delivering the BankConnect integration platform and ensuring seamless integration across the solution landscape. Mambu will provide the core banking engine as a cloud-native SaaS platform along with AWS as cloud service provider.

Together, Knowit and Mambu will deliver a robust and scalable architecture designed to meet both current and future business requirements, while enabling faster innovation and reduced operational complexity.

"This project represents an important step in strengthening Eiendoms kreditt's technological foundation. By combining Mambu's flexible core banking platform with Knowit's integration expertise and BankConnect, we are delivering a solution that supports future growth, regulatory requirements and efficient operations," says Eirik N. Christensen, CEO at Eiendoms kreditt AS.

"We are proud to support Eiendoms kreditt in modernising its core banking capabilities. Together with Mambu, we deliver a flexible and scalable platform that enables faster product development, improved data insight and a future-proof architecture," says Rune Ivarsflaten, CEO Knowit Financial Solutions.'

"Transforming a core banking stack is a significant move, which is why Eiendoms kreditt chose the most proven cloud-native ecosystem in the Norwegian market. The Mambu and Knowit partnership delivers a modern foundation that provides the agility and scalability needed to grow and we are excited to support them as they continue to evolve," says Jorno Levels, Commercial Lead Nordics at Mambu.

The agreement includes implementation of the new core banking platform with the project spanning over five years. The project has already been started.
