

## PowerCell Group Attains Aviation AS9100D Certification

PowerCell is proud to announce that it has obtained AS9100D certification, a globally recognised aviation quality management standard.

This achievement highlights PowerCell's dedication to providing high-quality fuel cell stack solutions for aviation, further establishing its position as a reliable industry partner. The AS9100D certification, which is technically equivalent to EN 9100:2018, JISQ 9100:2016, and KS Q 9100:2018, was granted by LRQA, a leading global assurance partner, after a thorough assessment of PowerCell's management system. It encompasses design, testing, qualification, manufacturing, and maintenance of fuel cell stacks, propulsion and auxiliary systems for hydrogen powertrains in aviation applications.

Richard Berkling, CEO of PowerCell Group, shared, "This achievement truly showcases our team's dedication, expertise, and relentless pursuit of excellence. Developing hydrogen-electric solutions for aviation demands the highest standards of quality and safety, and this certification is a clear testament to our ability to meet and even exceed those expectations. This serves as evidence of the contributions made by the employees at PowerCell to reach this milestone—their passion and commitment inspire us all to move forward."

Peter Wallin, COO of PowerCell Group, added, "Our team has worked tirelessly to ensure that our processes meet the rigorous demands of the aviation industry. With this certification in place, we are ready to begin serial production of fuel cell stacks for aviation. This is another testament to PowerCell Groups' ability to deliver at an industrial scale in combination with high-standard operational excellence."

### About PowerCell

PowerCell is a world leader in hydrogen electric solutions with unique fuel cell stacks and systems. With decades of experience, we use our expertise to accelerate the transition to an emission-free, more sustainable world. We target industries such as aviation, marine, off-road, on-road and stationary power generation. With our cutting-edge products we help our customers to reach net zero emissions already today.

We are headquartered in Gothenburg, Sweden with sales globally. PowerCell is listed on Nasdaq Stockholm.
