

Acconeer joins STMicroelectronics Partner Program to accelerate customer time-to-market

Acconeer AB, world leader in ultra-low power radars, announces that it has joined the STMicroelectronics Partner Program to make its Pulsed Coherent Radar sensors accessible to ST's customers. Their participation enables customers of both companies to benefit from state-of-the-art, high-quality components for innovative and extremely reliable radar-based applications.

To shorten development time and effort, Acconeer offers their customers evaluation kits and radar modules ready for integration in mass volume products. By combining ST's microcontrollers with Acconeer's 60 GHz radar sensors we can provide high performance, low power modules perfect for battery powered IoT devices.

"By becoming part of the ST Partner Program, we are in an even better position to deliver cutting-edge solutions to our joint customers. We have used ST MCUs for several of our radar modules, and this strategic collaboration will enable even better support to our joint customers," says Lars Lindell, CEO, Acconeer.

"Acconeer's knowledge of the ST portfolio and key expertise can help customers meet design challenges and shorten development time," said Alessandro Maloberti, Partner Ecosystem Director, STMicroelectronics. *"ST's review and vetting of ST Authorized Partners has enabled us to build a strong ecosystem of qualified and skilled partners who can enhance customers' developments with advanced technologies and multiple services to accelerate the design of their projects and solutions."*

STMicroelectronics, a global semiconductor leader serving customers across the spectrum of electronics applications created the ST Partner Program to speed customer development efforts by identifying and highlighting to them companies with complementary products and services. Moreover, the program's certification process assures that all partners are periodically vetted for quality and competence. For more information, please visit www.st.com/partners.

About Acconeer AB

With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm². The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye is the company's Certified Advisor (CA). For more information: www.acconeer.com.
