

Eolus Vind changes name to Eolus

Following a resolution at the Annual General Meeting on May 15 and approval from the Swedish Companies Registration Office (Bolagsverket) on June 3, Eolus Vind has now changed its name to Eolus. The change is part of a strategic initiative to strengthen the company's brand and reflect the full scope of its international operations within renewable energy.

"Eolus was founded in 1990 as a wind power developer in Sweden. Today, we are an international company that develops, realizes, and manages projects in wind power, solar power, and energy storage across several markets in Europe and the United States. I am therefore very pleased that we can now finally update our company name, making our identity clearer to our stakeholders," says Per Witalisson, CEO of Eolus.

The company's full new name is Eolus Aktiebolag (publ). The organization number (556389–3956) remains unchanged, and the company's shares will continue to be traded under the ticker symbol EOLU B on Nasdaq Stockholm.
