Enea Wins Most Innovative Embedded Security Category at the Global InfoSec Awards 2026

Enea, a global specialist in advanced telecom and cybersecurity software, has been named winner in the Most Innovative Embedded Security category at the annual Global InfoSec Awards organized by Cyber Defense Magazine, the industry's leading electronic information security magazine. The event took place for the 14th time and Enea won the award for its Enea Qosmos Probe product.

The Qosmos Probe represents a new generation of network sensors. Delivered as a software product, it combines advanced network visibility at up to 100 Gbps with IDS-based threat detection. It significantly increases the precision of security-related features and strengthens network protection in an increasingly complex cybersecurity environment.

"This award recognizes our commitment to real innovation – not innovation for its own sake, but technology built to address the cybersecurity threats that matter most," says Osvaldo Aldao, CTO at Enea. "The Qosmos Probe is at the heart of this work, delivering the deep network observability and threat detection that cybersecurity vendors and intelligence and defense agencies need to provide stronger protection across their solutions."

The pioneering and highly scalable software can be deployed on off-the-shelf hardware in any network environment and in less than two hours. It provides advanced visibility and threat detection, which strengthens the competitive advantage of cybersecurity vendors.

"Enea embodies three major features that we as judges look for in winners. They understand tomorrow's threats today, provide an effective solution, and innovate in unexpected ways that can help mitigate cyber risk," says Gary S. Miliefsky, Publisher of Cyber Defense Magazine.

The cybersecurity landscape is constantly evolving and has become particularly complex since the emergence of AI threats. Enea's solutions make it possible to detect current threats, be proactive on future ones, and help improve operational performance.

About Enea

Enea is a global specialist in advanced telecom and cybersecurity software, with a vision to make the world's communication safer and more efficient. Through continuous innovation, the solutions help secure, optimize, and monetize communication services. The company serves over 300 customers in more than 100 countries, including telecom operators, communication platform providers, cybersecurity vendors, and government agencies. Every day, more than 3 billion people rely on Enea software for seamless connectivity between people, businesses, and connected devices. The Enea headquarters are located in Stockholm, Sweden, and the company is listed on Nasdaq Stockholm. www.enea.com

About the Global InfoSec Awards

This is Cyber Defense Magazine's thirteenth year of honoring InfoSec innovators from around the Globe. Our submission requirements are for any startup, early stage, later stage, or public companies in the INFORMATION SECURITY (INFOSEC) space who believe they have a unique and compelling value proposition for their product or service. Learn more at www.cyberdefenseawards.com

About Cyber Defense Magazine

Cyber Defense Magazine is the premier source of cyber security news and information for InfoSec professions in business and government. We are managed and published by and for ethical, honest, passionate information security professionals. Our mission is to share cutting-edge knowledge, real-world stories and awards on the best ideas, products, and services in the information technology industry. We deliver electronic magazines every month online for free, and special editions exclusively for the RSAC Conferences. CDM is a proud member of the Cyber Defense Media Group. Learn more about us at <https://www.cyberdefensemagazine.com> and visit <https://www.cyberdefensetv.com> and <https://www.cyberdefenseradio.com> to see and hear some of the most informative interviews of many of these winning company executives. Join a webinar at <https://www.cyberdefensewebinars.com> and realize that infosec knowledge is power.
