

OPTICEPT RECEIVES NEW ORDER FROM JUICE PRODUCER IN COSTA RICA

OptiCept Technologies AB (publ) announces that the company today has received an order for its patented CEPT® system for pineapple juice extraction from an established producer in Costa Rica. Installation is planned for the fourth quarter of 2025.

The deal concerns an OPTICEPT® LJ7, a PEF system for liquid foods. This is the company's second sale to the juice segment. The first sale announced was to a leading juice producer in Southeast Asia. Increased juice extraction, improved quality, and a more sustainable production chain are factors that make the technology particularly attractive in growing markets within the premium segment.

"We continue to introduce our solutions in key markets systematically, and a major reference customer in Costa Rica is strategically important since the country is one of the world's largest exporters of pineapple juice. The deal validates the value we deliver, strengthens our position, and paves the way for more business in the region," says Thomas Lundqvist, CEO of OptiCept Technologies.

Costa Rica is one of the world's largest producers of pineapple products alongside the Philippines. With today's deal, OptiCept now has reference customers in two of the most important markets for pineapple juice production globally. The global pineapple juice market was valued at approximately USD 3.89 billion in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.64% in the coming years.

About Us

OptiCept Technologies AB (publ) provides the food and plant industry with technological solutions that contribute to a more sustainable world and enable climate-smart economic growth. OptiCept optimizes biological processes - Increased extraction from raw material, extended shelf life, reduced waste, and improved quality (taste, aroma, color, nutritional content) of the final product.

The positive effects of technology increase efficiency for our customers, provide better products for the consumers, and minimal impact on our environment. Through patented technology in PEF (pulsed electric field) and VI (Vacuum Infusion), the technology opens up new business opportunities for the food and plant industry worldwide. OptiCept's vision is to contribute to a sustainable world by offering efficient, green, cutting-edge technology that is easy to use in the areas of FoodTech and PlantTech.

The company is located in Lund and the share is traded on the Nasdaq First North Growth Market (ticker: OPTI). The Company's Certified Adviser is Tapper Partners AB.
