Medclair AB (publ)

## Medclair featured in French national media

**Medclair is highlighted on TF1, one of France's largest TV channels, following a segment featuring customer Denat Environnement. The segment showcases Medclair's products for recycling customers, including Expo P – the company's latest portable solution for measuring nitrous oxide exposure. This strengthens Medclair's visibility in France, a strategically important market.**

TF1 is an established digital news platform in France with a broad reach. The exposure contributes to increased awareness of Medclair's technology and strengthens the company's position in the French market, where growing focus on safety and reduced emissions is driving demand.

**A direct link to the segment can be found here**

"It was a great pleasure to see TF1—France's leading national news broadcast with over 5 million viewers—feature our work with Medclair's technology in addressing the growing N2O waste challenge," says Quentin Dillar, Denat Environnement.

"We are proud that our technology, including the new Expo P, is highlighted to a million-strong audience in French national media. TF1's coverage of our delivery to Denat confirms Medclair's leading role in meeting the growing demand for solutions for a safe work environment and reduced emissions," says Jonas Lundh, Medclair AB.
