

## PRESS RELEASE

March 10, 2023

# Ziccum AB joins innovative financial platform for Investor Relations management and European outreach

**Ziccum AB (publ) ('Ziccum') has entered into a partnership with the FinTech platform eucaps.com, aiming to offer existing shareholders a new forum for news and dialogue whilst also increasing visibility to new investors beyond Sweden.**

As of today, Ziccum has joined the financial technology platform eucaps.com. A new portal dedicated to Ziccum has been launched on the platform, containing new content on the company, reports and financials to be regularly updated, plus a secure chat forum for investors, to strengthen the resources and dialogue Ziccum offers to investors.

Furthermore, Ziccum, currently listed at Nasdaq First North in Sweden, is gaining visibility in the European small-cap segment thanks to this new model with European outreach. Eucaps calls itself "the one-stock shop for European growth companies". It offers access to all of Europe's small- and mid-cap exchanges and is available to investors from all over the world. A key function of its platform is to enable companies trading on European stock exchanges to share their offerings and increase their visibility with global investors.

Ziccum CEO Ann Gidner: "The Eucaps platform offers great opportunities for us to drive international interest in our share, whilst improving investors' dialogue and keeping shareholders nicely updated on our development."

Eucaps CEO and founder Henrik Wagenius: "We are proud that Ziccum has chosen to grow with us. Our goal is to enable Ziccum to reach even more investors, through the support available on the Eucaps platform, without having to double their workload. We are really looking forward to this cooperation and hope to help create new, secure and satisfied shareholders for Ziccum."

### **About Ziccum**

---

Ziccum is developing LaminarPace™, a unique ambient drying method for biopharmaceuticals and vaccines based on mass transfer, not heat transfer. The technology is offered by licensing to vaccine and biologics developers and manufacturers in the global pharmaceutical industry. By reducing drying stress to the active ingredient, LaminarPace™ uniquely enables particle-engineered, thermostable dry powder biopharmaceuticals which can be easily handled and transported and are highly suitable for novel administration routes. The technology has been successfully applied to mRNA, peptides, proteins, antibodies, lipids and enzymes as well as excipients and adjuvants, and is well suited for industrial application. Ziccum is listed on the Nasdaq First North Growth Market.
