Children of Morta coming to mobile

Fragbite Group AB's (publ) ("Fragbite Group") subsidiary Playdigious has announced upcoming game title Children of Morta which is set to release on mobile platforms October 7. Since releasing on PC and console in 2019, the game has sold more than 1 million copies to date.

Children of Morta is a game developed by Dead Mage and published by 11 Bit Studios. It was first released in September 2019 on PC and later the same year on consoles PlayStation 4, Xbox One and Nintendo Switch. Since first released, Children of Morta has sold more than 1 million copies and received much critical acclaim. Playdigious is porting Children of Morta to mobile devices with release date October 7.

"The revenue model of porting games to mobile provides a very strong foundation for the Fragbite Group gaming business area. We have seen how it performs with profitability, also during weaker market conditions, since we are working with tried and tested titles which have already enjoyed commercial success on other platforms. Playdigious keeps adding to their strong pipeline, with top-performing title Children of Morta showing great promise," says Stefan Tengvall, President and CEO, Fragbite Group

Children of Morta is an story-driven roleplaying game with roguelite elements. The game is part of the previously communicated expanded Playdigious pipeline of game releases for 2024.
