## Enea Introduces Enea AdaptiveMobile Security Brand

Ten months after the acquisition of AdaptiveMobile Security, Enea today launched the new brand Enea AdaptiveMobile Security.

“The changing geopolitical situation means that cybersecurity for telecom systems is more relevant than ever. We think many countries and telecom operators need to invest in security, and accordingly, we continue the development of products and go-to-market, including today’s brand reveal of Enea AdaptiveMobile Security,” says Jan Häglund, President and Chief Executive Officer of Enea. “We see great interest in our cybersecurity offering on the market and deliver products and expertise that can protect countries, telecom operators and subscribers against attacks and unauthorized access attempts, where Enea AdaptiveMobile Security represents a vital part of our portfolio.

Enea AdaptiveMobile Security is a world leader in mobile network security, protecting more than 2.4 billion subscribers. With deep expertise and a strict focus on network security, the organization’s award-winning solutions and services provide customers with unique threat detection and defensive intelligence and the most comprehensive portfolio in the market.

In addition to software for mobile network security, Enea offers software for data and traffic management, policy and access control, traffic intelligence, IoT security and Wi-Fi service management. The portfolio helps mobile operators and customers in other sectors to manage ever-increasing demands for performance, access control, and security in the networks of today and tomorrow.

“Mobile network operators face an ever-increasing threat landscape, which is only set to increase as 5G networks are rolled out,” says Brian Collins, SVP Security and Head of Enea AdaptiveMobile Security. “We are delighted to further integrate our brand as part of Enea. For our customers, the focus on network security products and development continues, with the same expert team but further strengthened by Enea’s broader portfolio. We have already leveraged product synergies within the company making it possible for us to drive the market and customer penetration, making the world of telecoms a safer place.”
