

Temporary Space chooses Precise YOUNiQ for facility access

Precise has entered into an agreement with Temporary Space Nordics AB – a Nordic provider of temporary premises – for the installment of Precise YOUNiQ for facility access in 10 of Temporary Spaces rigs, portable module units used at various building sites. In accordance with the agreement, Precise will receive approximately 1,5 MSEK in revenues over a three-year span.

Temporary Space offer brand new premises for office, education or the like as a substitute for building new or renovating. By using Precise product for facility access, the company can digitalize its onboarding process, without the need for keys or tags to enter the premises. Precise YOUNiQ integrates facial recognition with the door access system to conveniently and securely grant access to restricted facilities.

“We are delighted to deliver our product for convenient and secure facility access to Temporary Space, a company that today are forced to handle hundreds of keys every day and thus, understands the benefits of streamlining its onboarding process. We are confident that our product will be of high value for Temporary Space and the many users that use their rigs daily, and we look forward to further discussions regarding more potential installations”, says Precise CEO Stefan K. Persson.

“In our ambition to give our customers a spot-on experience of our premise’s solutions, we believe our cooperation with Precise is an important step, a way to be in the frontline of our markets digitalization”, says Temporary Space Country manager in Sweden, Nina Flood.

About Temporary Space

Temporary Space has 30 years of experience in temporary premises that the company establish with top-class modules. The company can offer brand new premises for office, education or the like as a substitute for building new or renovating. Thanks to the fact that the premises consist of several composite modules, Temporary Space can offer flexible solutions tailored to customers specific needs.
