

Audiodo continues Nothing partnership with Personal Sound in new Headphone (1) Pro

The latest collaboration brings hearing personalisation to Nothing's new flagship over-ear headphone

Malmö, Sweden – 29th September: Audiodo continues its partnership with Nothing with the inclusion of Audiodo Personal Sound in the new Nothing Headphone (1) Pro. The latest launch brings audio tailored to each listener's hearing to Nothing's new flagship over-ear headphone.

Headphone (1) Pro is the latest collaboration between Audiodo and Nothing, following their work together on Headphone (1), Ear (3) and Headphone (a).

For the original Headphone (1), Personal Sound arrived after launch through a software update in October 2025, giving owners more from the headphones they already had. A short hearing test in the Nothing X app allowed them to tailor the sound to their hearing, bringing out greater clarity and detail. With Headphone (1) Pro, that personalised listening experience is part of the headphone from day one.

This continued integration of Audiodo technology across Nothing's audio range reflects a shared focus on making a more individual listening experience part of everyday use.

Personal Sound built around each listener

Understanding that everyone's hearing is completely different, Audiodo Personal Sound accounts for these differences through a short hearing assessment that measures how each ear responds to different frequencies. This creates an individual hearing profile, which is used to adjust the audio separately for each ear.

The result is a listening experience designed to reveal greater clarity and detail while preserving the headphone's intended sound. With a simple guided setup, listeners can enjoy sound tailored to their hearing without needing to make complex manual adjustments.

"Our work with Nothing has grown across several products, and we're pleased to continue that partnership with Headphone (1) Pro," said **Emilio Roig, Marketing Manager** at Audiodo. "People can listen to the same headphones and hear things quite differently, and Personal Sound takes those differences into account, helping each listener hear more of the detail in their music. Bringing it to Nothing's new flagship puts that individual experience at the heart of the product."

Nothing Headphone (1) Pro

Nothing Headphone (1) Pro combines a triple-driver acoustic system with 10-microphone active noise cancellation, LDAC support and up to 30 hours of listening with ANC enabled. Its

aluminium frame, titanium components and glass surfaces continue Nothing's distinctive approach to design. Audiodo Personal Sound complements this acoustic platform by adapting the listening experience to the person wearing it to ensure they hear audio the way it is supposed to be heard.
