

Momentum Group AB (publ)

Interim Report 1 Jan–31 Mar 2022

2022

Stable business situation and positive earnings trend despite global concerns

Favorable underlying demand in both business areas, but the global component shortage and Covid-19 related sickness absence had a certain impact on sales during the quarter. Organic sales growth combined with good cost control and well-managed price increases from suppliers led to an increase in EBITA of 19 per cent compared with the first quarter of the preceding year.

First quarter 2022

- Revenue increased by 14 per cent to SEK 399 million (350), of which 11 per cent was for comparable units.
- Operating profit rose by 6 per cent to SEK 37 million (35), corresponding to an operating margin of 9.3 per cent (10.0). Profit included expenses affecting comparability of SEK -4 million attributable to the separate listing process.
- EBITA increased by 19 per cent to SEK 44 million (37), corresponding to an EBITA margin of 11.0 per cent (10.6).

	Q1			R12 until Mar		
	2022	2021	Δ	2022	2021	Δ

Earnings per share before and after dilution, SEK	0.55	0.55	-	2.30	1.90	21%
Operating margin	9.3%	10.0%		10.2%	10.6%	
EBITA margin	11.0%	10.6%		11.6%	11.0%	
Return on working capital (EBITA/WC)				62%	53%	
Equity/assets ratio				50%	36%	

- Profit for the quarter increased by 4 per cent to SEK 28 million (27), corresponding to earnings per share of SEK 0.55 (0.55).
- The return on working capital (EBITA/WC) was 62 per cent (53).
- The equity/assets ratio was 50 per cent (36) at the end of the period.
- An Extraordinary General Meeting (EGM) on 26 January resolved on a changed share structure and a bonus issue.
- The Annual General Meeting was held on 11 February and resolved to change the company from a private to a public company.
- On 23 March, an EGM of Shareholders of Alligo AB resolved to distribute and list Momentum Group separately.
- Momentum Group was listed on Nasdaq Stockholm's main list on 31 March.

Events after the end of the period

- No significant events took place after the end of the period.

A quarterly presentation is now available on the company's website, momentum.group, where CEO Ulf Lilius and CFO Niklas Enmark review the report and provide an update on operations.

Increased focus enabling us to leverage on strategic and operational opportunities

We noted favourable underlying demand during the first quarter in both of our business areas. The global shortage of components impacted deliveries during the quarter and Covid-19 related sickness absence, primarily in our service companies, impacted charged hours at the beginning of the quarter. Organic sales growth combined with good cost control and well-managed price increases from suppliers led to an increase in EBITA of 19 per cent compared with the first quarter of the preceding year.

A new start as an independent company

When the EGM of Shareholders of our former Parent Company resolved on 23 March 2022 to spin off and list Momentum Group separately, this marked the start of new opportunities. With an even clearer focus on the development of our operations in components and services for the Nordic industry, we now have better conditions to expand our operations. Momentum Group is an active owner that focuses on developing and acquiring companies in the product and service categories where we possess knowledge, expertise and experience. We have a distinct growth strategy with the ambition of growing both through acquisitions and the development of existing operations. These are opportunities we are now working fully to realise.

On 31 March, Momentum Group 2.0 was introduced on the Nasdaq Stockholm Mid Cap list – a new company with a long-standing, tried and tested business philosophy.

Stable business situation despite global concerns

We noted favourable underlying demand during the first quarter of the year in most of our operations. However, the global shortage of components impacted final deliveries somewhat and Covid-19 related sickness absence, primarily in our service companies, impacted billed hours at the beginning of the quarter. We

believe that the shortage of components will continue during the second quarter, and we expect price increases in certain areas. Just as they have done in the past few years, our entrepreneurship-driven companies with decentralised responsibility will continue to implement mitigating measures to maintain a sound product delivery capacity and to handle price increases.

“We have a distinct growth strategy with the ambition of growing both through acquisitions and the development of existing operations. These are opportunities we are now working fully to realise.”

ULF LILIUS

An exciting year ahead

We are now standing on our own two feet, with a focus on growing our business organically and through acquisitions. Given our strong financial performance and

distinct strategy, I look forward to continuing an exciting financial year for Momentum Group as an independent listed company.

Stockholm, April 2022

Ulf Liljus
President & CEO

Sales performance

Comments on the market

General demand was favourable during the first quarter. Due to a global increase in demand, the shortage of materials and resources in some of the Group's product areas continued to dampen sales to a certain extent through delivery delays during the quarter.

Despite the worsened security situation and the crisis in Ukraine, sales in the Group's operations are yet to be impacted. Elevated uncertainty due to the political situation, the continued global effects of the Covid-19 pandemic and the clear rise in inflation, particularly in energy and fuel, make it likely that the shortage of

components will continue during the second quarter and that price increases can be anticipated in certain areas, such as freight.

The ongoing pandemic situation at the beginning of the quarter limited customer visits and sick leave during the period had a certain impact. Despite this, our dialogue with customers is positive and their perception is that our operations have retained a healthy delivery capacity in light of the prevailing situation. The current situation has not led to any changes in material assessments compared with those applied in the prospectus for admission to trading of the company's Class B shares published in March 2022.

Sales trend during the first quarter

The sales trend was positive during the first quarter for both business areas. The operations worked proactively to secure the best possible delivery capacity and offset increases in purchase prices and shipping costs.

During the first quarter, revenue increased 14 per cent compared with the year-earlier period and amounted to SEK 399 million (350). Growth in comparable units was about 11 per cent. The quarter included one more trading day than the corresponding quarter in the preceding year.

Earnings performance

First quarter 2022

Operating profit rose by 6 per cent to SEK 37 million (35), corresponding to an operating margin of 9.3 per cent (10.0). Operating profit included expenses affecting comparability of SEK -4 million (-) related to the separate listing and mainly pertain to advisory costs, review costs and separation costs.

Operating profit was charged with amortisation of intangible non-current assets of SEK -3 million (-2) arising in conjunction with acquisitions and with depreciation of right-of-use assets and tangible non-current assets of SEK -12 million (-9). No exchange-rate translation effects impacted operating profit (0).

EBITA increased by 19 per cent to SEK 44 million (37), corresponding to an EBITA margin of 11.0 per cent (10.6).

Profit after financial items totalled SEK 36 million (34) and profit after tax amounted to SEK 28 million (27), which corresponds to earnings per share of SEK 0.55 (0.55) for the quarter.

EBITA and operating profit, SEK million

Components business area

Group of companies in industrial components, services and solutions for industry, with expertise in industrial improvement consisting of companies with leading specialist positions in their respective market niches.

Operations

The sales trend in the Components business area was positive during the first quarter of the year.

In Momentum Industrial, sales increased in all product areas (bearings, automation, transmission and seals), with particularly strong demand and sales at the end of the quarter. Among the customers, the largest increase was mainly in the steel sector and other machine manufacturing.

The specialist companies Öbergs, Etab and JNF all trended positively during the quarter, particularly through increased customer activity in system sales and projects. However, the impact of delivery delays and material shortages, primarily in hydraulics and pneumatics, led to deliveries of certain complete orders/systems being postponed.

Financial development Q1 2022

Revenue rose by 8 per cent to SEK 322 million (299) compared with the corresponding quarter of the preceding year. Revenue for comparable units, measured in local currency and adjusted for the number of trading days, rose by approximately 6 per cent.

EBITA amounted to SEK 42 million (39), corresponding to an EBITA margin of 13.0 per cent (13.0).

The business area's profitability, measured as the return on working capital (EBITA/WC), increased to 75 per cent (65).

Return on working capital (EBITA/WC)				75%	65%	

Services business area

Group of companies in industrial services in Sweden that, through its services, offers longer life and efficiency of installed machines and carries out new installations. In addition, solutions are offered for digitised maintenance.

Operations

The Services business area performed well during the quarter in terms of both sales and earnings. The company Rörick Elektriska Verkstad contributed significantly to this performance as the acquisition of workshops from Assemblin is now fully integrated.

In total, the level of incoming work and enquiries remained favourable. However, some locations, primarily during the beginning of the quarter, experienced challenges as a result of Covid-19 related sickness, resulting in a negative impact on workshop activities and customer cultivation.

Financial development Q1 2022

Revenue increased to SEK 82 million (54). This increase was partly attributable to Rörick's closing of the acquisition of the three electromechanical service workshops from Assemblin through a conveyance of assets and liabilities on 1 April 2021.

EBITA amounted to SEK 7 million (4), corresponding to an EBITA margin of 8.5 per cent (7.4).

The business area's profitability, measured as the return on working capital (EBITA/WC), amounted to 47 per cent (59). The decrease was a result of the somewhat lower EBITA margin on a rolling 12-month basis, partly attributable to costs for the integration of businesses as well as the somewhat higher level of capital tied-up in acquired operations.

Profitability, cash flow and financial position

Profitability

The Group's profitability, measured as the return on working capital (EBITA/WC), increased to 62 per cent (53) for the most recent 12-month period. The return on equity for the corresponding period was 28 per cent (31).

Cash flow

Cash flow from operating activities before changes in working capital for the reporting period totalled SEK 13 million (39). The decrease compared with the preceding year was primarily the result of paid tax of SEK -38 million (-6), a large proportion of which concerned supplementary payments regarding tax for the 2021 financial year.

During the period, inventories increased by SEK 4 million and operating receivables by SEK 0 million. Operating liabilities decreased by SEK 1 million. Accordingly, cash flow from operating activities for the reporting period amounted to SEK 8 million (36).

Cash flow from investing activities for the reporting period amounted to SEK 0 million (-79). Cash flow from investing operations for the comparative period pertained to net investments in non-current assets of SEK -1 million and acquisitions of subsidiaries and other business units of SEK -78 million.

Cash flow from financing operations includes a net change in interest-bearing liabilities of SEK -12 million (102).

The comparative period also included contributions and other transactions with owners with a net impact of SEK 6 million.

Financial position

At the end of the reporting period, the Group's financial net loan liability amounted to SEK 63 million, compared with SEK 62 million at the beginning of the financial year. At the end of the period, the Group's operational net loan receivable amounted to SEK 57 million, compared with SEK 61 million at the beginning of the financial year.

Cash and cash equivalents, including unutilised granted credit facilities, totalled SEK 1,066 million. The company has a granted credit facility of SEK 800 million with a remaining maturity of about three years (with an option to extend) and unutilised credit in the company's committed credit facility totalling SEK 200 million. At the end of the period, the Group had met all financial obligations to lenders.

The equity/assets ratio at the end of the reporting period was 50 per cent (36).

Equity per share totalled SEK 9.60 at the end of the reporting period, compared with SEK 9.05 at the beginning of the financial year.

The balance-sheet total at the end of the period was SEK 979 million, compared with SEK 984 million at the beginning of the financial year.

Business combinations

Acquisitions constitute an important part of Momentum Group's growth strategy and the company has a well-established model for evaluating, completing, integrating and welcoming new companies to the Group. Since the beginning of 2021, Momentum Group has completed five business combinations in line with its strategy that complemented the Group's service and maintenance offering.

Acquisition of electromechanical workshops from Assemblin

With the aim of further strengthening the Group's market position in service and maintenance for Swedish industry, an agreement was signed to acquire three electromechanical service workshops from Assemblin EI AB in early February 2021. The acquired workshops, which have their origin in NEA workshops (Närkes Elektriska), generate annual revenue of approximately SEK 90 million with favourable profitability and have some 45 employees. The acquisition was completed as a conveyance of assets and liabilities and closing took place on 1 April 2021.

Acquisitions of Mekano and Mekano i Sävedalen

Momentum Group also signed an agreement in early February 2021 to acquire 70 per cent of the shares of Mekano AB and 100 per cent of the shares of Mekano i Sävedalen AB, further strengthening the Group's market position in service and maintenance for Swedish industry. Mekano is one of Sweden's leading suppliers of products and services for the industrial services market, and the two Mekano companies generate combined annual revenue of approximately SEK 145 million with favourable profitability and have some 85 employees. Closing took place on 18 February 2021.

Acquisition of Öbergs i Karlstad

In early February 2021, Momentum Group acquired 100 per cent of the shares in Öbergs i Karlstad AB ("Öbergs"). The acquisition of Öbergs, a market-leading specialist company in pneumatics in Sweden, further strengthens the Group's position as a leading supplier of industrial components and related services to Swedish industry. Öbergs generates annual revenue of approximately SEK 50 million with favourable profitability and has 12 employees. Closing took place on 5 February 2021.

Acquisition of Intertechna in Hammarö

In late August 2021, Momentum Group acquired 100 per cent of the shares in Intertechna AB. The acquisition of Intertechna, a specialist company in digitised maintenance for industry, further strengthens the Group's position as a leading supplier of industrial components and related services to Swedish industry. The acquired company generates annual revenue of approximately SEK 25 million and has eight employees. Closing took place on 1 October 2021.

¹ Refers to information for the full year on the date of acquisition.

² The acquisition was carried out as a conveyance of assets and liabilities.

³ Momentum Group initially acquired 70 per cent of the shares in each company.

Acquisitions	Time	Revenue	No. of employees	Business Area
AB Carl A. Nilssons EI. Reparationsverkstad, SE	September, 2015	SEK 20 million	13	Services
Arboga Machine Tool AB, SE	March, 2017	SEK 10 million	5	Services

Mekano i Sävedalen AB, SE	February, 2021	SEK 35 million	10	Services
Öbergs i Karlstad AB, SE	February, 2021	SEK 50 million	12	Componants
Service workshops from Assemblin EI, SE	April, 2021	SEK 90 million	45	Services
Intertechna AB, SE	October, 2021	SEK 25 million	8	Services

Other

Parent Company

The Parent Company's revenue for the reporting period amounted to SEK 3 million (1) and the loss after financial items totalled SEK -8 million (-1). The loss of SEK -7 million (-1) for the reporting period does not include any Group contributions received or similar items (-).

Employees

At the end of the reporting period, the number of employees in the Group amounted to 499, compared with 484 at the beginning of the year.

The share

An EGM held on 26 January 2022 resolved on the issue of Class A and Class B shares, the split of the company's shares and a bonus issue. At the end of the reporting period, the share capital amounted to SEK 25.2 million and the number of shares to 50,480,889.

Class of share

Class A shares (10 votes/share)	564,073
Class B shares (1 vote/share)	49,916,816
Total	50,480,889

Momentum Group's Class B share (ticker MMGR B) was introduced on Nasdaq Stockholm on 31 March.

Transactions with related parties

An EGM of Alligo AB on 23 March 2022 approved the spin-off and separate listing of the Momentum Group subsidiary. Other than purchases of certain consumables from companies in the Alligo Group, no transactions having a material impact on the Group's position or earnings occurred between Momentum Group and its related parties during the reporting period. The remuneration of senior management follows the guidelines established in the Group.

Risks and uncertainties

Momentum Group's earnings, financial position and strategic position are impacted by a number of factors that are within the control of Momentum Group as well as a number of external factors. The most important external risk factors for Momentum Group are the economic and market situation for the industrial sector. Other risks include the competitive situation in the Group's markets and the significance of efficient logistics with high accessibility, in which the accessibility of the Group's logistics centres are important for certain flows of goods, as well as a dependence on identifying and developing relationships with qualified suppliers. The Group's opportunities and risks also include the completion of acquisitions and related capital requirements and the intangible surplus value that this can result in. Cyber-related risks are also considered important.

The future trend in the market and in demand may be impacted by the uncertain security situation as a result of Russia's invasion of Ukraine and the continued spread of Covid-19, which could also impact delivery times and accessibility. The Parent Company is impacted indirectly by the above risks and uncertainties through its function in the Group.

Events after the end of the period

No significant events occurred after the end of the period.

The Parent Company has its own internal bank function tasked with coordinating the Group's financial activities and ensuring that systems are available for efficient cash management. To support this, the Parent Company is the holder of the Group's cash pool and the Parent Company's current receivables and liabilities essentially comprise the subsidiaries' utilisation of credit facilities and the subsidiaries' surplus in the cash pool. At the beginning of the year, current receivables also included the Group contribution received of SEK 80 million, which was settled during the first quarter of 2022.

Notes

1. Accounting policies

The Interim Report for the Group was prepared in accordance with IFRS and by applying IAS 34 Interim Financial Reporting, the Swedish Annual Accounts Act and the Swedish Securities Market Act. In addition to the financial statements and associated notes, other disclosures in accordance with IAS 34.16A are also presented in other sections of the report. The Interim Report for the Parent Company was prepared in accordance with the Swedish Annual Accounts Act and the Swedish Securities Market Act, which conforms to the provisions detailed in RFR 2 Accounting for Legal Entities. The same accounting policies and bases of judgement described in Note 1 Summary of key accounting policies and Note 2 Key estimates and judgements in Momentum Group's prospectus for admission to trading of the company's Class B shares published in March 2022 and pages F7-F13 have been applied.

IASB has issued additions and amendments to standards that will take effect for the Group on or after 1 January 2022. These additions and amendments are deemed not to be material for the consolidated financial statement.

Parent Company accounting policies

The Parent Company applies the Swedish Annual Accounts Act (1995:1554) and recommendation RFR 2 Accounting for Legal Entities issued by the Swedish Financial Reporting Board. RFR 2 stipulates that the Parent Company, in the annual accounts for the legal entity, is to apply all IFRS and statements adopted by the EU to the greatest extent possible within the framework of the Swedish Annual Accounts Act and with due consideration given to the relationship between accounting and taxation. The recommendation states which exceptions/additions should be made from/to IFRS. Combined, this results in differences between the Group's and the Parent Company's accounting policies in the primary areas of subsidiaries, leased assets, taxes, Group contributions and shareholder contributions.

The accounting policies are published in full on Momentum Group's website momentum.group/en/accounting-principles.

2. Financial instruments

Momentum Group measures financial instruments at fair value or amortised cost in the balance sheet depending on their classification. In addition to items in the financial net debt, financial instruments also include accounts receivable and accounts payable. The carrying amount of all of the Group's financial assets is deemed to be a reasonable approximation of their fair value. Liabilities measured at fair value comprise hedging instruments for which the fair value is based on observable market data and which are therefore included in level 2 according to IFRS 13.

SEK million	31 Mar 2022	31 Mar 2021	31 Dec 2021
Financial assets measured at fair value			
Financial investments	0	0	0
Derivative hedging instruments	0	0	0
Financial assets measured at amortised cost			
Long-term receivables	1	1	1
Accounts receivable	250	225	255
Current investments	-	178	-
Cash and cash equivalents	66	32	70
Total financial assets	317	436	326
Financial liabilities measured at fair value			
Derivative hedging instruments	0	1	-
Financial liabilities measured at amortised cost			
Option liability	23	25	22
Interest-bearing liabilities	129	281	132
Accounts payable	161	148	153
Total financial liabilities	313	455	307

3. Operating segments and information on income

The Group's operating segments comprise the business areas Components and Services. The operating segments are consolidations of the operational organisation, as used by Group management and the Board of Directors to monitor operations. Group management, comprising the CEO and CFO, are the Group's chief operating decision makers. **Components** consists of Momentum Industrial, ETAB Industriautomation, Öbergs and JNF

Køge, which offer spare parts, maintenance and repairs to customers in the industrial sector in the Nordic region. **Services** consists of Rörick Elektriska Verkstad, Carl A Nilssons Elektriska Reparationsverkstad, Mekano and Intertehna, which together provide technical industrial services, mainly to the Swedish market. **Group-wide** includes the Group's management, finance and support functions. The support functions include internal communications, investor relations and legal affairs.

Financial items and taxes are not distributed by operating segment but recognised in their entirety in Group-wide. Intra-Group pricing between the operating segments occurs on market terms. The accounting policies are the same as those applied in the consolidated financial statements. Revenue presented for the geographic markets below is based on the domicile of the customers.

Performance measures

Momentum Group uses certain financial performance measures in its analysis of the operations and their performance that are not defined in accordance with IFRS. Momentum Group believes that these alternative performance measures provide valuable information for the company's Board of Directors, owners and investors, since they enable a more accurate assessment of current trends and the company's performance when combined with

Definitions of alternative performance measures and their purpose

Operating profit

Profit before financial items and tax.

Used to present the Group's earnings before interest and tax.

Items affecting comparability

Items affecting comparability include revenue and expenses that do not arise regularly in the operating activities. Items affecting comparability for the period pertain to costs for preparations ahead of the separate listing and mainly pertain to advisory costs, review costs and separation costs.

The separate disclosure of items affecting comparability clarifies the development of operational activities.

EBITA

Operating profit adjusted for items affecting comparability and before any impairment of goodwill and amortisation and impairment of other intangible assets arising in connection with acquisitions and equivalent transactions.

Used to present the Group's earnings generated from operating activities.

Operating margin, %

Operating profit relative to revenue.

Used to measure the Group's earnings generated before interest and tax and provides an understanding of the earnings performance over time. Specifies the percentage of revenue remaining to cover interest payments and tax and to provide profit after the Group's expenses have been paid.

EBITA margin, %

EBITA as a percentage of revenue.

Used to measure the Group's earnings generated before interest and tax and provides an understanding of the earnings performance over time. The EBITA margin

based on revenue from both external and internal customers is presented per business area (operating segment).

Profit margin, %

Profit after financial items as a percentage of revenue.

Used to assess the Group's earnings generated before tax and presents the share of revenue that the Group may retain in earnings before tax.

Return on working capital (EBITA/WC), %

EBITA for the most recent 12-month period divided by average working capital measured as total working capital (accounts receivable and inventories less accounts payable) at the end of each month for the most recent 12-month period and the opening balance at the start of the period divided by 13.

The Group's internal profitability target, which encourages high EBITA and low tied-up capital. Used to analyse profitability in the Group and its various operations.

Return on capital employed, %

Operating profit plus financial income for the most recent 12-month period divided by average capital employed measured as the balance-sheet total less non-interest-bearing liabilities and provisions at the end of the most recent four quarters and the opening balance at the start of the period divided by five.

Presented to show the Group's return on its externally financed capital and equity, meaning independent of its financing.

Return on equity, %

Net profit for the most recent 12-month period divided by average equity measured as total equity attributable to Parent Company shareholders at the end of the most recent four quarters and the opening balance at the start of the period divided by five.

Used to measure the return generated on the capital invested by the Parent Company's shareholders.

Financial net loan liability

Financial net loan liability measured as non-current interest-bearing liabilities and current interest-bearing liabilities, less cash and cash equivalents at the end of the period.

Used to monitor the debt trend and analyse the Group's total indebtedness including lease liabilities.

Operational net loan liability / Net loan receivable

Operational net loan liability measured as non-current interest-bearing liabilities and current interest-bearing liabilities excluding lease liabilities less cash and cash equivalents at the end of the period.

Used to monitor the debt trend and analyse the Group's total indebtedness excluding lease liabilities.

Equity/assets ratio, %

Equity attributable to Parent Company shareholders as a percentage of the balance-sheet total at the end of the period.

Used to analyse the financial risk in the Group and show how much of the Group's assets are financed by equity.

Change in revenue for comparable units

Comparable units refer to sales in local currency from units that were part of the Group during the current period and the entire corresponding period in the preceding year. Trading days refer to sales in local currency depending on the difference in the number of trading days compared with the comparative period.

Other units refer to the acquisition or divestment of units during the corresponding period.

Used to analyse the underlying sales growth driven by changes in volume, the product and service offering, and the price for similar products and services across different periods. Refer to the reconciliation table on page 4.
