

SenzaGen wins order for GARD®skin worth about SEK 1m from a new chemicals customer

Lund, February 23, 2023

SenzaGen has been selected to test chemicals from yet another new world leader, this time in the energy sector. The order is worth about SEK 1 million and is for testing with SenzaGen's high-performance non-animal skin sensitization test, GARD®skin. The tests will be performed in SenzaGen's GLP-certified laboratory in Lund.

The customer, a global group of companies with an innovative focus in the chemicals industry, will use GARDskin to assess whether their new product candidates can cause allergic reactions on the skin.

"It is gratifying to see that our focused sales and marketing activities are continuing to deliver increasingly better results. Following the OECD approval obtained last summer, we now see growth in demand for our innovative GARD® tests. The ability to perform highly accurate tests on chemical substances early in the development process makes it possible for companies to avoid high development costs for potentially hazardous substances while also reducing the number of animal tests," says Peter Nählstedt, President and CEO of SenzaGen.

With high reliability, GARD®skin test results help product development companies and producers ensure that the products they bring to market are free of allergies, now enabling them to prove this in their regulatory filings. The GARD®skin test has been approved by the OECD as a test guideline for non-animal skin sensitization since 30 June 2022. The test is the first and only non-animal OECD-approved test for assessing the allergenicity of chemicals based on genomics and machine learning.

About us

SenzaGen aims to be a leader in *in vitro* science and testing, driving the transition from animal testing to methods better suited to reflect human biology. The Company provides high-performance, non-animal test methods and innovation and consulting services based on state-of-the-art technology. Non-animal methods are more effective, more accurate and less expensive than traditional animal-based methods while also helping to reduce the number of laboratory animals. The Company has a growth strategy centered around continued commercialization of its proprietary GARD® test platform, expansion of its test portfolio and evaluation of acquisition opportunities of profitable and growing companies with complementary offerings. SenzaGen has its headquarters and GLP-certified laboratory in Lund, Sweden and subsidiaries in the US and Italy. For more information, please visit: www.senzagen.com.

SenzaGen is listed on Nasdaq Stockholm First North (ticker: SENZA). FNCA Sweden AB is the company's Certified Adviser.
