

## QleanAir breaks new ground within the office segment in Germany

**QleanAir Holding AB (publ), the premium supplier of solutions for clean indoor air, wins the first orders for Facility solutions within the office segment in Germany. The orders consists of 65 freestanding air cleaners on 12 month rental contracts to the State Office for Regulatory Affairs in Berlin.**

The State Office for Regulatory Affairs is investing in 65 freestanding air cleaners to reduce the risk of employees and visitors getting infected by the coronavirus. The standalone air cleaners are rented on 12 month contracts and will be placed in the public areas, offices and workplaces where employees have direct contact with visitors. The State office provides the public with services regarding residential, personal or vehicle matters.

*- This is an important breakthrough for our new solution in a new customer segment, says Tobias Willi, Managing Director of QleanAir GmbH. We are pleased to be able to contribute to creating a safer environment in our shared public spaces.*

After an initial test of performance and service levels on five units, 20 units were installed in March. Another 40 air cleaners were installed the first week of May.

The standalone air cleaner FS 30 HEPA was launched in the end of 2020 and is designed to reduce the levels of virus, bacteria, and other hazardous particles in the air in health care facilities, schools, workplaces, and other public spaces.
