The game Northgard launches multiplayer feature

Fragbite Group AB's subsidiary Playdigious SAS has today launched an update of the popular game Northgard with support for multiplayer mode.

Northgard is a strategy game based on Nordic mythology where you control a clan of Vikings who fight for control of a mysterious newfound continent. The game Northgard, which has sold a total of over 2 million copies on PC, console and iOS devices, has now received a new, improved version for mobile where the biggest news is a multiplayer function. There, users can meet against each other, one on one, or in teams; 2 against 2, 3 against 3 or 2 against 2 against 2. Or "all against all" for up to 6 contemporary players.
