

Mycronic receives order for a Prexision Lite 8 Evo

Mycronic AB (publ) has received a replacement order for a Prexision Lite 8 Evo from an existing customer in Asia. The order value is in the range of USD 8-10 million. Delivery of the system is planned for the second quarter of 2026 and is to replace one of the customer's older systems.

The Prexision Lite 8 Evo is designed to meet the requirements for cost-efficient production of photomasks for displays up to G8 mask size.

"Less complex photomasks account for a large part of the total volume of photomasks produced and remain very important for the display industry. This order, which forms part of our replacement program, shows that the Prexision Lite 8 Evo meets our customers' needs for cost-efficient production of photomasks", says Charlott Samuelsson, Sr VP Pattern Generators at Mycronic.

Mycronic's Pattern Generators division provides mask writers and metrology systems for display manufacturing and production of semiconductors.
