Netelinfra signs framework agreement with Huddinge Municipality worth MSEK 50–95

Netelinfra has signed a framework agreement with Huddinge Municipality regarding its fibre network with an order value of MSEK 50–95. The agreement also includes the fibre network of Huge Bostäder and Huddinge Samhällsfastigheter.

Huddinge Municipality is one of the largest municipalities in Stockholm County. It has an extensive fibre network, for which Netel has served as the framework agreement partner and contractor for the majority of the expansion over the past eight years. The new framework agreement covers fibre installations, excavation and other groundworks, in-building networks, as well as on-call and standby services.

The framework agreement runs for two years, with an option for an additional two years. The total value over the four-year period is estimated at MSEK 50–95.

The municipal housing company Huge Bostäder and the entity Huddinge Samhällsfastigheter are also covered by the agreement. Huge Bostäder has approximately 8,000 apartments, while Huddinge Samhällsfastigheter owns and manages the majority of Huddinge's schools and preschools, residential care facilities for the elderly, sports halls, and outdoor recreational facilities.

"We are proud to have once again been entrusted by Huddinge Municipality, now with an expanded scope of responsibility," says Martin Reinholdsson, President and CEO of Netelinfra. "This is proof that we have a good understanding of the projects and the existing network, and that we are meeting the customer's high expectations."

In June of this year, Netelinfra announced a framework agreement with Huddinge Municipality covering paving work. The agreement runs for four years and has a total value of approximately MSEK 200, and was signed by Netelinfra's subsidiary, Asfaltsgruppen Sverige.

About us

Netelinfra is a leading Northern European infrastructure services group. The Group was formed through the merger of Netel and Infrea. We maintain, improve, and expand infrastructure in Sweden, Norway, and Germany. Through our four segments Infra, Paving, Power, and Telecom, we provide a comprehensive offering within critical infrastructure. In 2025, Netelinfra generated revenue of approximately SEK 5 billion and has over 1,200 employees. Read more at netelinfra.com.
