

PRESS RELEASE
19 November 2021 11:00:00 CET

Binero Group becomes a Pexip deployment partner, offering a fully compliant cloud-based video conferencing and collaboration solution

Binero Group AB (publ) ("Binero") has been named deployment partner to Pexip Holding ASA (publ) ("Pexip"), a Norwegian headquartered company delivering video-based communication and collaboration. The Pexip solution can now be deployed on Binero's local, fully GDPR-compliant cloud platform, delivering an ideal solution for clients who place high demands on data privacy, such as financial services, healthcare, and government.

Pexip simplifies video communication across borders, businesses and platforms. Their video platform can be hosted on-premises in a secure data centre, in the cloud, or a combination of both. Post pandemic behaviour has seen an acceleration of the ongoing digital transformation of most sectors, and so many organizations are now looking to migrate their on-premise deployments to a digital cloud solution. Subsequently, they also need to address compliance issues with regards to data privacy regulations within the EU.

In order to enable and support the continued digitalization of industries such as financial services, healthcare, and government, Pexip's video and collaboration services can now be deployed on Binero's EU-compliant public cloud platform.

"We are happy to be working with Binero in Sweden. Their core values of security and data sovereignty align closely with the Pexip solution and reflect customer demands as security concerns become increasingly top of mind," said **Michael Whittam, VP Sales North Europe at Pexip.**

Binero is a Swedish Cloud & Infrastructure service provider, producing and delivering modern infrastructure and platform as a service (IaaS and PaaS) with an associated portfolio of managed and professional services, from state-of-the-art data centres in the Stockholm region.

"As a Binero partner, Pexip - and ultimately their end-users - benefit from our local, compliant cloud solutions. We provide safe and secure infrastructure and platforms that are highly scalable, making it a great choice for Pexip's cloud ready customer segments focused on data privacy regulations" says **Charlotte Darth, CEO at Binero Group.**
