July 2, 2024

Analyst interview with Ziccum's CEO on new project and expanding business dialogues

In a Swedish video interview, Ziccum's CEO Ann Gidner answers questions from analyst Jonathan Furelid on the topic of business dialogues and agreements.

Apart from elaborating on the significance of the recently concluded Feasibility Study Agreement with ReCode Therapeutics, a leader in the booming mRNA field, Ann Gidner also concludes on the successful completion of the first stage of the Big Pharma II Feasibility Study. Furthermore, Ziccum's CEO underscores the increasing industry-wide interest generated by Ziccum's technology, LaminarPace™, as evidenced by the growing number of leading industry players reaching out to Ziccum.

About Ziccum

Ziccum is developing LaminarPace™, a unique drying method for biopharmaceuticals and vaccines based on mass transfer, not heat transfer. The technology is offered by licensing to vaccine and biologics developers and manufacturers in the global pharmaceutical industry. By reducing drying stress to the active ingredient, LaminarPace™ uniquely enables particle-engineered, thermostable dry powder biopharmaceuticals which can be easily handled and transported and are highly suitable for novel administration routes. The technology has been successfully applied to mRNA, peptides, proteins, antibodies, lipids and enzymes as well as excipients and adjuvants, and is well suited for industrial application. Ziccum is listed on the Nasdaq First North Growth Market.
