

iZafe signs partnership agreement with Doro on the distribution and sale of Dosell in Sweden

Stockholm, Sweden – iZafe Group AB (publ) (NASDAQ First North: IZAFE B), a leading company focused on the digitalisation of medication handling, is announcing that it is entering into a collaborative partnership with Doro in Sweden as a direct result of the successful take-off with Doro in Norway.

“Thanks to the positive outcome of our partnership with Doro in Norway, we have now also partnered with Doro in Sweden to address the Swedish market. Doro Norway have been delighted with our stable technology and favourable pricing as a valuable complement to their social welfare technology platform,” remarks Anders Segerström, CEO, iZafe Group.

As previously communicated, iZafe Group has initiated a pilot project with Doro in Norway and begun deploying 50 Dosell medication dispensing robots in the homes of care recipients in one of the 30 municipalities in which Doro has implemented its social welfare platform. iZafe Group is today announcing that the partnership has been extended to include Doro in Sweden.

Doro enjoys a unique market position as a leading supplier of social alarms, remote monitoring and alarm reception services in the Swedish market. The partnership with Dosell enables Doro to further expand its offering in the same segment.

“Naturally, we at Doro could not be more pleased about the partnership with iZafe. iZafe is a company that is clearly compatible with our values-based approach and our vision of simplifying life and providing peace of mind to our seniors. Dosell is a state-of-the-art product that makes life easier for seniors and care workers alike. We are looking forward to working with iZafe and have high hopes that they will be able to help us make our current and future offering to our customers even better,” says Martin Puumalainen, Country Director Sweden Business Area Doro Care.

About Doro AB
