

QleanAir wins first significant order within healthcare segment in France

The order consists of 20 units of freestanding air cleaners for a private hospital in the south of France. This is the first major order from the health care sector in France within Facility solutions.

The client 1NDIS, a supplier for medical equipment in France, have purchased 20 units of FS 30 HEPA and FS70 HEPA to be delivered during May to a private hospital in Montpellier. The air cleaners, equipped with certified HEPA 14 filters, meet the specific requirements of high degree of cleanliness and low sound levels.

- The awareness of the importance of healthy indoor air is spreading in France, especially in the hospital sector where you want to reduce the virus level and create a safer environment for the staff who take care of corona patients. We are pleased that we were able to establish this first contract with 1NDIS and look forward to a fruitful cooperation in future, says Cornelia Norén, Head of Sales France at QleanAir Scandinavia. 1NDIS was looking for a high-quality product that respects all the norms in the hospital sector. With the pandemic and the high-quality air requirement in the hospitals, it was necessary to have an air cleaner that can filter not only dust etcetera, but also microorganisms including virus and bacteria. Therefore, the choice of HEPA 14 filtration. After doing a thorough market search, they found QleanAir Scandinavia and were impressed by what we offer. A long-term partnership with a full service offering.

1NDIS is a leading supplier for medical devices in France. They offer a wide variety of applicable and most reliable products in the hospital sector, among this protective gear and ventilation products.

- At QleanAir we are proud to be part of providing safer and healthier working environments for customers in segments that have been the most severely impacted by the pandemic. We see a great need in the healthcare sector and are proud to be able to contribute to a safer work environment also in the healthcare sector in France, says Fredrik Aminoff, VP European Sales at QleanAir Scandinavia.

Both FS 70 HEPA and FS 30 HEPA were launched during 2020, and are designed to reduce the levels of virus, bacteria, and other hazardous particles in the air. The units are designed for environments with high demands on efficient air cleaning and low sound levels, such as health care facilities, schools, workplaces, and public spaces.
