

Enersense signs agreement on maintenance of Telia Towers' mast and equipment room infrastructure

Enersense International Plc | Investor News | October 11, 2024 at 15:30:00 EEST

Enersense, a provider of emission-free energy solutions, and Telia Towers Finland Oy, a Finnish mast and equipment infrastructure owner, have signed an agreement on the maintenance of mast and equipment room infrastructure. The four-year agreement includes maintenance work on Telia Towers' mast and equipment room infrastructure throughout Finland and will be recognised in the order book of the Connectivity business area for the fourth quarter of 2024. The cooperation can be continued with two one-year options.

"We are very pleased to continue our cooperation with Enersense nationwide. This agreement is significant for us and guarantees the high-quality maintenance of our masts. Enersense's high-quality work and customer orientation have convinced us in our previous cooperation. We can now better focus on developing the comprehensive customer experience and our business, as our partner takes care of the trouble-free operation of our masts and equipment facilities", says Joni Korkeakangas, Production Director at Telia Towers.

"We are already a partner of Telia Towers, and we are happy that our cooperation will expand to cover the whole country with the agreement. The agreement deepens our partnership and enables new ways to proactively and sustainably develop critical infrastructure maintenance. The agreement is a clear indication of our expertise and appreciation as well as the benefits of long-term cooperation for the customer", says Miika Erola, Vice President of Enersense's Connectivity Operations.
