

Ekobot enters into an agreement with Kapitalpartner to support establishment and growth in the Danish market for field robots

Ekobot has entered into an agreement with the Danish company Kapitalpartner. Kapitalpartner is a corporate finance and investment banking firm that serves companies and their owners with advice, capital or assistance to complete transactions. Kapitalpartner has extensive experience with listed companies and assists with increasing knowledge of the stock market through investor relations and market relations services. Kapitalpartner also has solid experience in the field of Agtech and field robotics in Denmark.

Ekobot CEO Erik Jonuks comments on the agreement:

- Through this year's marketing work, we have come into contact with Danish retailers and customers. The great interest from these has of course given us a greater focus on the Danish market for agricultural robots. In Denmark, there are also two of our colleagues in the industry, Agrointelli and Farmdroid. These have done a fantastic job of opening up the Danish market for agricultural robots. With the help of Kapitalpartner, we now hope to be able to take on the Danish market both in terms of customers but of course also growth capital for our continued expansion.

About Ekobot

Ekobot AB (publ), based in Västerås, conducts business based on the business concept of developing, manufacturing and selling autonomous agricultural robots that enable efficient precision cultivation where weed management takes place completely without or with minimal use of herbicides. The company's vision is to provide the agricultural sector with a long-term sustainable alternative for reducing or completely eliminating chemical spraying in crops of crops for human consumption. The company is listed on the Nasdaq First North Growth Market.
