About LED iBond International A/S

Founded in 2014, LED iBond offers sustainable, innovative lighting solutions, based on years of development and deep knowledge of modern LED technology combined with advanced packaging and simple assembly technology.

LED iBond is focusing on three key business lines: Parking Facilities (Parking Houses & Solar Carports), Indoor Farming (Greenhouses & Vertical farms) and Service Stations (Canopies & Car Wash).

Our technology platforms TRACY®, GRACY™ and HORTISABER™ offer unique value propositions.

TRACY® and GRACY™ are developed to meet demands for high design flexibility, robustness, easy integration into building construction, less cables and low total costs of ownership due to market leading energy efficiency.

HORTISABER™ is a new generation of LED grow lights for indoor farming. It's developed to meet the demands from modern greenhouse productions with outstanding energy efficiency, light uniformity, superior passive cooling design that enhances the lifespan significantly and the unique linear slim-line design ensures minimal daylight shadow.

LED iBond's lighting solutions have been installed in many large-scale projects ranging from Parking Houses, Charging Hubs, Solar Carports and Greenhouses to customized illumination projects such as shopping centres, intelligent shelf lighting and elevator ceilings.

LED iBond is a Danish design and manufacturing company.
