

Audiodo continue to push the boundaries of what personalized sound can offer

Apple's recent announcement of Hearing Protection, Hearing Test, and Hearing Aid features for AirPods Pro 2 highlights the growing importance of personalized sound experiences. At **Audiodo**, we've been pioneering these innovations for years, developing personal sound features like adjustable acoustic transparency, hearing protection, and a customizable hearing test.

Audiodo continue to push the boundaries of what personalized sound can offer, and we're eager to see how our solutions stack up as the future unfolds.
