

ALLIGATOR BIOSCIENCE TO PRESENT AT 10TH ANNUAL IMMUNO-ONCOLOGY SUMMIT, OCTOBER 12 -14, 2022

Lund, Sweden, October 10, 2022 - Alligator Bioscience AB (Nasdaq Stockholm: ATORX) today announced that Mattias Levin, PhD, Sr Team Manager Antibody Engineering at Alligator Bioscience, will present at the 10th Annual Immuno-Oncology Summit being held in Boston and virtually, October 12-14.

Presentation Details:

- Title: ***"Bispecific Tumor Antigen Conditional Agonistic Antibodies in Immuno-Oncology"***
- Date: Thursday 13 October 2022
- Time: 10:30 am EDT / 4:30 pm CEST

The presentation will focus on Alligator's Neo-X-Prime™, a CD40-based bispecific platform with a dual mechanism of action that, in addition to CD40, targets tumor associated antigens (TAA) expressed at high densities. This enhances the uptake of tumor material by dendritic cells and increases effective neoantigen cross-priming of tumor specific T cells, resulting in increased anti-tumor efficacy. Neo-X-Prime™ bispecific antibodies address a key need in immune-oncology by increasing tumor specific T cells in the tumor microenvironment.

The presentation will highlight preclinical data and the medical opportunities in multiple cancer indications of ATOR-4066, Alligator's preclinical first-in-class bispecific CD40 agonist.

Registration for the conference is open [here](#).

The information was submitted for publication, through the agency of the contact person set out below, at 08:30 a.m. CET on October 10, 2022.

About Alligator Bioscience

Alligator Bioscience AB is a clinical-stage biotechnology company developing tumor-directed immuno-oncology antibody drugs. Alligator's pipeline includes the two key assets mitazalimab, a CD40 agonist, and ATOR-1017, a 4- 1BB agonist. Furthermore, Alligator is co-developing ALG.APV-527 with Aptevo Therapeutics Inc., several undisclosed molecules based on its proprietary technology platform, Neo-X-Prime™, and novel drug candidates based on the RUBY™ bispecific platform with Orion Corporation. Out-licensed programs include AC101/HLX22, in Phase 2 development, by Shanghai Henlius Biotech Inc. and an undisclosed target to Biotheus Inc.

Alligator Bioscience's shares are listed on Nasdaq Stockholm (ATORX) and is headquartered in Lund, Sweden.
