

Ekobot wins the Agtech challenge 2021 competition

In fierce competition among Sweden's leading agricultural innovations, Ekobot today won first prize in Hushållningssällskapets innovation competition Agtech challenge

The Agtech challenge competition was arranged by the Household Society in collaboration with ATL, Lantmännen, Vreta Kluster, Dataväxt and the magazine Lantmannen.

The competition was decided by a very well-known jury with roots in the Swedish agricultural industry.

The jury consisted of:

Bo Selerud, CEO HS Konsult, Competition Jury Chairman Johan Ocklind, CEO Vadsbo Mjölkkristina Yngwe, Member of Parliament Helena Silvander CEO Tillväxtbolaget Ulrik Wedelin, Bank Director Handelsbanken Skog och lantbruk Peter Annas, Director R&D & Innovation Lantmännen, Lilian Almroth, Editor-in-Chief LRF Media Helene Oscarsson, Head of Communications and Development Vreta Kluster

The goal of the Agtech Challenge is to lay the foundation for new products and services that benefit profitability and the environment for Swedish food producers. The goal is also to contribute to more new innovation companies, new forms of collaboration and contact surfaces between technology companies, agricultural companies and students / researchers who in the long run attract new skills and create new jobs.

About Ekobot

Ekobot AB (publ), based in Västerås, conducts business based on the business concept of developing, manufacturing and selling autonomous agricultural robots that enable efficient precision cultivation where weed management takes place completely without or with minimal use of herbicides. The company's vision is to provide the agricultural sector with a long-term sustainable alternative to reduce or completely eliminate chemical spraying in crops of crops for human consumption.

About Ekobot

Ekobot is the result of the founder Ulf Nordbeck's thoughts and desire to combine robotics and healthy sustainable food production. Ekobot's goal is to be able to offer practical and sustainable solutions to agricultural issues while reducing workload with autonomous tools for vegetable farmers. Ekobot has grown and combined today a team of experts in agricultural robotics with shareholders who share their convictions and understand the challenges of start-ups.
