

Westpay Launches SoftPOS – Turning Any Android Device Into a Certified Payment Terminal

Westpay AB ("Westpay"), a leading Payment Service Provider, today announces the official launch of SoftPOS – a groundbreaking Tap-to-Pay solution that turns any Android device into a secure, contactless and certified payment terminal.

With SoftPOS, merchants can now accept **Visa, Mastercard, American Express and Swish** payments directly on their smartphone or tablet—no external hardware required. The app is easy to install, quick to activate, and fully integrated with Westpay's broader ecosystem of in-store and online payment services.

"This is a true leap forward for mobile commerce. SoftPOS reflects our commitment to combining user-friendly innovation with the highest standards of security and independence," says **Sten Karlsson, CEO of Westpay**.

Key benefits of Westpay SoftPOS:

- **Frictionless onboarding** – Download the app and start accepting payments within minutes
- **Seamless reporting** – Unified transaction data across both SoftPOS and terminals, visible in the Westpay portal
- **Acquirer independent** – Merchants retain full freedom to choose their preferred acquiring partner
- **Designed for flexibility** – Works standalone or embedded in existing sales systems
- **Compliant and future-proof** – Built to meet accessibility and regulatory demands, including the upcoming EU Accessibility Act

SoftPOS is more than a new product—it is a strategic extension of Westpay's **SaaS transformation**, offering recurring value, simplified deployment, and speed to market for partners across sectors.

By making smart payments even more accessible, Westpay continues to lead the way in shaping the future of commerce.

When merchants choose Westpay, they choose independence, resilience, and readiness.

Secure. Swedish. Ready.
