## Great interest in CoreTherm® - Experience meeting

**ProstaLund organizes Experience Meeting for Swedish Coretherm® users in Stockholm from 31 March to 1 April.**

ProstaLund has invited all Swedish CoreTherm® users to a 2-day seminar to create a forum for exchange of experiences regarding thermotherapy treatment of benign prostate enlargement. There is great interest among both treating urologists and assistant nurses and about 35 participants are registered.

The sessions on exchange of experience aim to "share best practice" in terms of care both before, during and after treatment. The meeting will be spiced up by the fact that Dr Fredrik Stenmark will present the results of his study on long-term follow-up of patients with large prostates who have been treated with CoreTherm®. Representatives from all CoreTherm Excellence Centers will present their experiences and ProstaLund will give the participants an update on what the care of benign prostate enlargement looks like in the country and what regional differences there are.

"It is really good that the interest in this meeting is so great, and I am proud that we can be a catalyst and contribute to important knowledge transfer through this forum," says CEO Johan Wennerholm.
