

Homevolt Honored with Prestigious iF Design Award 2025

Polarium, a leader in energy storage solutions, is proud to announce that its consumer battery Homevolt has been honored with the esteemed iF Design Award 2025, a globally recognized mark of excellence in design. This prestigious award, which has been celebrating outstanding design achievements since 1954, was awarded by a distinguished 131-member jury of independent experts from 23 countries.

Homevolt has been awarded the world-renowned design prize IF Award for its outstanding design in the Product discipline of the Building Technology category. The iF Design Award is renowned for its rigorous selection criteria, evaluating thousands of global entries on innovation, functionality, and sustainability. Homevolt's groundbreaking design, which combines sleek Scandinavian aesthetics with advanced energy storage technology, stood out among the submissions.

"This award is a true testament to Homevolt's exceptional design and innovation. We are seeing strong interest in our product, and the Residential segment continues to experience rapid growth," said Eric Ekberg, EVP Business Area Residential at Polarium. "We take great pride in delivering a product that not only looks great but also enhances energy self-sufficiency and sustainability."

About Homevolt

Homevolt is an innovative energy storage solution designed to revolutionize home energy management. With cutting-edge technology, intelligent software, and Scandinavian design, Homevolt empowers users to reduce costs, increase energy independence, and contribute to a more sustainable future.

Homevolt is more than just a battery – it is the core of a smart home energy management system. Featuring a high-quality consumer battery with an integrated inverter from Polarium, Homevolt seamlessly integrates AI-driven software that optimizes energy consumption based on real-time electricity prices. Designed with a modular and compact structure, it offers flexibility in capacity upgrades while ensuring durability for outdoor installation.

About Polarium

Polarium is a leading energy storage developer. We make energy storage and optimization solutions built on lithium-ion battery technology for businesses within telecom, commercial, industrial and residential facilities across the world. Polarium was founded in 2015 on the conviction that safe, smart and sustainable energy storage solutions will be key to empower the transition to a truly, sustainable energy future. We are an impact business contributing to the sustainable energy transformation by enabling renewables, electrification and intermittent power supply. Our cutting-edge and easily adaptable modular battery technology enables us to be in the forefront of developing state-of-the-art sustainable energy storage and optimization solutions for today - and tomorrow. Polarium is an entrepreneurial company headquartered in Stockholm, with production in Sweden, South Africa and Vietnam, and customers across the world.
