

Biomethane Station Data November 2025

10 December 2025 – ReFuels N.V., a leading European supplier of renewable biomethane (Bio-CNG) for the decarbonisation of heavy goods vehicles (HGVs), today published Bio-CNG station data for November 2025.

- A total of 5,577 tonnes of Bio-CNG were dispensed from CNG Fuels' 16 public access refuelling stations, up 9% from 5,118 tonnes in November 2024 (14 stations)
- Average daily dispensed volume reached a record level of 186 tonnes, compared to 171 tonnes per day in the year-earlier period
- A daily average of 2,170 vehicles refuelled across the station network, an increase of 11% year-on-year
- Prices for Renewable Transport Fuel Certificates (RTFCs) averaged 28.1 pence, up 14% compared with 24.8 pence in November 2024

"Demand for biomethane continues to grow as fleet operators swap out diesel HGVs for low-emission and cost-efficient Bio-CNG powered trucks. The more moderate November annualised growth rate reflects a particularly strong comparison base from November last year, when a large number of new trucks were delivered into service. We expect the annualised growth to accelerate again over the coming months, as a large number of new trucks go into operation," said Philip Fjeld, CEO and co-founder of ReFuels.

In addition to Bio-CNG dispensing, CNG Fuels generates revenue from sales of Renewable Transport Fuel Certificates (RTFCs). The average RTFC price in November was 28.1 pence, up from 24.8 pence in November 2024. RTFCs are awarded at a rate of 3.8 certificates per kilo of Bio-CNG dispensed and sold to fuel suppliers with a blending obligation under the UK's Renewable Transport Fuel Obligation (RTFO) scheme.

CNG Fuels supplies biomethane through a growing network of refuelling stations, currently operating 16 public access Bio-CNG stations strategically located on major UK trucking routes. Two additional stations are under development – one in South Wales and one in Swindon – to further expand network capacity.

ReFuels provides monthly operational updates, normally released within ten working days after the end of each month.

About ReFuels

ReFuels is decarbonising Europe's truck fleet through its 40% ownership of CNG Fuels - a fully integrated clean fuel infrastructure platform combining sourcing of renewable biomethane (Bio-CNG), Renewable Transport Fuel Certificates (RTFCs), and ownership and operation of the UK's largest clean fuel station network. By the end of 2028, ReFuels aims to have the capacity to serve 20,000 heavy goods vehicles per day, with the long-term ambition of becoming Europe's leading integrated supplier of alternative fuels for commercial fleets.
