

HANZA continues the Horizon program and strengthens its regional organization

HANZA continues to optimize its industrial platform under the Horizon program. Following the acquisition of five factories specializing in heavy mechanics and complex assembly from Fortaco, HANZA is now further developing its Group organization.

The current Central Europe manufacturing cluster will be divided into two clusters: Cluster Poland and Cluster Czech Republic. The new structure will provide clearer operational management and facilitate the integration of both existing and newly acquired operations.

The Group's manufacturing clusters and gateways will be organized into three geographical regions. Region North will comprise Sweden and Poland. Region Center will comprise Germany, the Czech Republic, and Gateway Israel. Region East will comprise Estonia, Finland, and Gateway Abu Dhabi.

The changes will be implemented gradually throughout 2026 and will affect future financial segment reporting. The current segment structure, "Main Markets" and "Other Markets," will be replaced as of January 1, 2027, by three geographical regions: Region North, Region East, and Region Center.

The Group's R&D offering will be integrated into the regions. As a result, the current third segment, Business Development and Services, will in the future include only business development activities and costs that are not allocated to the manufacturing segments.
