

Obducat receives Awards for achievements in nanoimprint

Obducat AB (publ) is the recipient of the 30-Year Nanoimprint Pioneer Award and the 30 Years Nanoimprint Grand Achievement Award in connection with the 30th anniversary celebration of nanoimprint technology at the NNT 2025 conference in California.

The awards are presented by the 30 Year Nanoimprint Celebration Organizing Committee, chaired by Professor Stephen Y. Chou (Princeton University). The Pioneer Award honors the invaluable efforts and support provided during the early, contested years of NIL and the pioneering work that laid the groundwork for the field's breakthroughs, while the Grand Achievement Award recognizes actors whose significant contributions have significantly advanced the development and use of NIL.

"We see these awards as an acknowledgement of long-term collaborations with customers and partners. Our focus is to enable industrialization of NIL by combining proven technology with innovative process solutions that provide our customers with benefits such as scalability and cost-effective production," says Patrik Lundström, CEO of Obducat.

About Obducat AB (publ)

Obducat AB (publ) is an innovative developer and supplier of technologies, products and processes used for the production and replication of advanced micro and nano structures. Obducat's products and services serve the demands of customers worldwide within the LED and Display, Optics and Photonics, MEMS and Sensor industries as well as in High Power and High Frequency electronics and Biomedical Devices. Obducat's technologies include nano imprint technology, resist- and wet processing technologies. Obducat has its own market presence in Sweden, Germany, Japan, USA, England, Portugal and China and the headquarter is located in Lund, Sweden. Obducat is a public company. The Obducat share is traded on the Swedish NGM Main Regulated Equity exchange. Read more at www.obducat.com or contact us via email investorrelations@obducat.com
