

Ortivus' electronic patient record system are down for some United Kingdom based customers due to a cyber-attack

On the evening of 18 July Ortivus' systems were subject to a cyber-attack affecting UK customer systems within our hosted datacenter environment.

The electronic patient records are currently unavailable and are until further notice handled using manual systems. No patients have been directly affected. No other systems have been attacked and no customers outside of those in the hosted datacenter have been affected.

Ortivus are currently working in close collaboration with the affected customers to restore the systems and recover data. The affected customers are the ones using MobiMed ePR, electronic patient record systems in a hosted environment.

The organization behind the cyber-attack is not known at this stage and the incident has been reported to the authorities as a crime.

About Ortivus

Ortivus develops and commercialises MobiMed, e-health and medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' innovations are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm. The company has, since 1998, a wholly owned subsidiary based in the United Kingdom and since 2022, a wholly owned subsidiary based in Denmark.

MobiMed is a modular platform that connects and enable real-time information sharing throughout the prehospital care chain. It is currently used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform, MobiMed, consists of several product modules that are completely integrated but can also be used stand-alone. MobiMed comprises four main solutions: MobiMed Monitor, that measures, monitors and shares patients' vital parameters and ECG in real-time, MobiMed ePR, - an electronic patient record for decision support, collection of patient data and clinical documentation, MobiMed enRoute, - a tool for navigation and case management, and MobiMed Life - a range of stand-alone defibrillators.

MobiMed saves vital seconds and enable healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
