

Umecrine Cognition will attend the JP Morgan 41st Annual Healthcare Conference 2023 in San Francisco

STOCKHOLM – January 9, 2023. Umecrine Cognition today announces that the company will attend the JP Morgan 41st Annual Healthcare Conference in San Francisco, USA. The event takes place 9-12th of January 2023 and gathers companies, organizations, and financial institutions in the life science sector from around the world.

"We are looking forward to meeting with potential future partners at the JP Morgan's Annual Healthcare Conference. The progress in our development programs of golexanolone in primary biliary cholangitis and hepatic encephalopathy has created a lot of interest before the meeting. Our newly communicated and intriguing data for golexanolone in Parkinson's disease, and potentially also in other neurodegenerative diseases in the central nervous system that share similar underlying mechanisms, will also be discussed at the meeting," says Anders Karlsson, CEO of Umecrine Cognition.

About Umecrine Cognition AB

Umecrine Cognition AB develops a completely new class of pharmaceuticals against neurological disturbances in the brain that may arise as a consequence of several underlying diseases, leading to strongly reduced cognitive functions and wakefulness. Results from an internationally recognized clinical Phase 2 study indicates that the company's most advanced drug candidate, golexanolone, normalizes the brain's signaling and improves cognition as well as wakefulness in patients diagnosed with hepatic encephalopathy. The continued drug development will initially focus on patient groups whose symptoms arise from chronic liver diseases. The mode of action is however relevant in a number of other indications.
