

Registration of trademark BeammWave® in USA

BeammWave has obtained trademark protection for BeammWave® in the USA.

BeammWave already has trademark protection in China, EU, UK, Taiwan and Japan. Now the US has also been approved.

"As a global technology leader in digital beamforming, we need global protection. With 38 patent families and now good brand protection, we have it. It fits well with increased sales efforts of our advanced development platform ADP1 which was both launched and sold to a first customer of Molex LLC., during the end of 2023", says Stefan Svedberg, CEO at BeammWave.
