Press release, Gothenburg, October 27, 2023

Momentum Industrial expands in Norway with establishment in Kristiansand

Momentum Industrial – a part of Momentum Group, is expanding its operations in Norway by establishing a new unit in Kristiansand with sales, technical expertise and local warehousing. The establishment strengthens Momentum Industrial's market position as the Nordic region's leading supplier of industrial components and related services with a focus on sustainability.

This is the third establishment in Norway for Momentum Industrial, which already has operations in Oslo and Mo i Rana. In Sweden, Momentum Industrial has 32 local service units across the country, from Malmö in the south to Kiruna in the north.

” Our experience is that we meet our customers' needs in the best possible way if we have a local presence. This will enable us to attract more competent employees with knowledge of the needs of the local market, which means that we can help customers in the region achieve their goals in an even better way. In this way, we create opportunities for local market leadership,” says Jimmy Norlinder, CEO of Momentum Industrial.

The new unit in Kristiansand is located at Buråsen 28. It offers local warehousing with good access to products and services, know-how from leading manufacturers, customised product training, logistics solutions and on-call service to industrial customers in the area.

” Our focus is to make our customers' businesses more efficient and sustainable. We do this by offering quality products with high efficiency and a long service life, as well as services that streamline purchasing, inventory management, operational optimisation and preventive maintenance. We are very pleased with the establishment in Kristiansand, where we, together with our employees, customers and partners, will work together for a sustainable industry in the region,” says Jonas Steen, Regional Manager Norway at Momentum Industrial.
