

Mycronic receives order for two SLX mask writers

Mycronic AB (publ) has received an order for two SLX mask writers from an existing customer in Asia. The order value is in the range of USD 14-16 million. Delivery of the first system is planned for the fourth quarter of 2024, while the second system is planned for delivery during the first quarter of 2025.

The SLX laser mask writer meets rising demand for photomasks for the semiconductor industry and a future need for replacement and modernization. Photomasks manufactured by laser mask writers are of high importance and account for a majority of all photomasks produced for semiconductor manufacturing. SLX is a modern and energy efficient mask writer based on the same technology as Mycronic's mask writers for displays.

"This repeat order for two SLX mask writers from an existing customer who already has the SLX in production, constitutes further confirmation that the SLX meets the customer's high expectations on performance, productivity and reliability. We are grateful for the continued trust in Mycronic", says Charlott Samuelsson, Sr VP Pattern Generators at Mycronic.

Mycronic's Pattern Generators division provides mask writers for display manufacturing and production of semiconductors.
