Investment Objective

Metals have been essential in the development of human civilization. Metals enabled humanity to take major leaps during the Bronze and Iron Ages. In today's growing high-tech and green-tech world, humanity is entering a new metal age.

Industrial metals, such as steel, aluminum, copper, and zinc are essential for us when electrifying our society and building products such as cars and planes. Tech metals, such as lithium, nickel, cobalt, and rare earth metals have unique properties that make them indispensable in applications such as batteries, solar cells, computers, and space technology.

Holdings

Portfolio Holdings Target Weight Allocation. Live percentage may differ due to holdings change of value/cash flows.
