

## Impact Coatings Will Expand to New Headquarters in Linköping in 2024

**Impact Coatings is moving to new headquarters in Linköping in the autumn of 2024. The new facility is under construction and situated in Kåparp, directly adjacent to Mjärdevi and Linköping Science Park, as well as Linköping University. The new two-story building will mean significantly expanded opportunities for production and development of the company's sustainable coating solutions within PVD technology. Wilzés Fastighetsförvaltning will own and manage the property. Groundwork has begun and construction will start in the fall.**

With the new headquarters, amounting to nearly 3,000 m<sup>2</sup>, Impact Coatings doubles the production area in Linköping, together with departmentalized office spaces, conference rooms, and with the possibility of expansion over time. This means an increased capacity to deliver coating services from the company's Swedish Coating Service Center, which also serves as a demo center for customers. It allows for greater production of industrial PVD systems for customers and for the company's own coating operations, while offering larger development areas and a new lab for the company's R&D department.

Impact Coatings is in an expansive phase, underpinned by a rapid global development in green fossil-free hydrogen, where coating technology is needed and demanded in the area. The construction project in Linköping takes place at the same time as the company has started production in a new Coating Service Center in Shanghai, China, and plans for another establishment in the USA in 2024.

"The new headquarters is an important puzzle piece in our growth journey. With a new attractive location, an advantageous logistical placement, and production-optimized workspaces in a modern environment we will be able to continue to attract the region's best talent. At the same time, we can grow our business and streamline as well as automate our production flows. Key aspects to be able to fully support the fast-growing industries that together with us work on the next generation of energy and transportation solutions," said Torbjörn Sandberg Kanon, CEO of Impact Coatings.

"It is gratifying to carry out this project for Impact Coatings - not least considering their commitment in the green technology sector and use of sustainable production methods, which goes hand in hand with our values," said Andreas Wilzén, CEO at Wilzés Fastighetsförvaltning. "I would also like to commend Linköping municipality, for the fast pace and positive attitude throughout the planning process," he continued.

### **About Impact Coatings**

Impact Coatings offers customer-focused coating services, clean coating technologies, and flexible coating systems with focus on hydrogen solutions, autonomous safety functions, and tailored coating solutions for high-end applications.

The company utilizes vacuum deposition methods - sustainable processes to apply thin layers of metal or ceramic coatings that improve performance and durability. Impact Coatings markets coating equipment under the trademark INLINECOATER™ and coating materials under the trademark MAXPHASE™. The company's service models and systems are flexible and scalable to fit the fast-paced markets the company operates within.

The Impact Coatings share is listed on Nasdaq First North Growth Market (Nasdaq Nordic). The company's Certified Adviser is Redeye AB.

### **About Wilzéns**

Wilzéns consists of several different businesses where a stable foundation in construction is complemented by painting, HTC floor grinding and property management. In recent years, the company has also invested in its own properties, which constitutes its own department.

Wilzéns Produktion AB forms a group together with the subsidiaries Wilzéns Bygg AB, Wilzéns Mark AB, Wilzéns Måleri AB and Torvinge Maskinuthyrning AB. Wilzéns Produktion AB is a subsidiary of AWIL Holding AB, which also owns the property management group Wilzéns Fastighetsförvaltning AB. AWIL Holding AB is owned by Andreas Wilzén.
