

Net Insight achieves ISO 27001 Certification for information security management

Stockholm, Sweden – Net Insight has achieved ISO 27001 certification, the globally recognized standard for information security management. This certification reinforces Net Insight’s commitment to protecting information assets, ensuring robust internal processes, and maintaining the highest levels of security and compliance throughout the company.

Net insight has recently been certified and has received its ISO/IEC 27001:2022 certificate from the accredited certification body Intertek. The ISO 27001 certification is awarded to organizations that meet stringent requirements for establishing, implementing, maintaining, and continuously improving information security management practices. Achieving this certification affirms Net Insight’s strong commitment to upholding the highest standards of information security across its operations and safeguarding the integrity of its internal processes and data.

ISO 27001 is considered the leading international benchmark for managing information security. The certification confirms that Net Insight has implemented a comprehensive and independently audited framework for identifying, managing, and mitigating security risks across its IT environment.

“Net Insight’s ISO 27001 certification means our customers’ data and media assets are protected by rigorous, independently audited security controls,” says Crister Fritzson, CEO of Net Insight. “This helps our customers meet their own compliance requirements and reduces the risk of costly security incidents. By partnering with Net Insight, customers can focus on delivering world-class services, confident that their information is secure.”

About Net Insight

Net Insight (Nasdaq: NETI B) provides the highest performing, most open video transport and media cloud technology for content providers as the industry standard for flexibility and service across live contribution, distribution and remote production media workflows.

For over 25 years, the world's leading content owners, broadcasters, production companies, service providers and enterprises have trusted Net Insight's Emmy® Award winning Nimbra technology to guarantee media delivery. Today, Net Insight partners with hundreds of customers in over 85 countries to ensure media flows across managed and unmanaged IP networks, and the cloud – from anywhere, to everywhere. It enables customers to get the best from any mix of virtualized, cloud and IP technology and is the only platform to support all the major industry standards, protocols and clouds.

Net Insight also provides time synchronization for 5G and other critical networks. The innovative Zyntai solution improves network resilience, and reduces costs and deployment time.
