

## Naerogel® by Svenska Aerogel – A new platform driving future innovation and commercialization

Svenska Aerogel (“the Company”) is launching Naerogel®, a new brand for the Company’s high-performance aerogel material. The launch marks the next step in the Company’s development – from research and industrialization to a growing global commercial platform. The new brand replaces the previous product name Quartzene® and reflects Svenska Aerogel’s continued advancement in aerogel material solutions.

In recent years, Svenska Aerogel has focused on industrializing and commercializing its aerogel material for a global market. Naerogel® builds on more than two decades of research and development in aerogel technology, with strong roots in Nordic innovation, quality, and customer-driven development. Through structured innovation efforts and close collaboration with customers, the Company has continuously improved the material’s performance.

The material builds on the same technological platform and high-performance porous aerogel structure as Quartzene®, while offering customers an enhanced material designed to meet increasing demands for energy efficiency and thermal insulation.

### Naerogel® offers:

- Up to 15 % improved thermal insulation performance
- Material manufactured using silica, water, and only renewable energy
- A flexible and scalable platform for future innovation and product development
- Customized solutions based on specific market and application needs, strengthening existing use cases while enabling new applications

“Naerogel® represents both our history and our future. In recent years, we have continued to develop our aerogel material based on market needs, enabling us to offer more efficient products and innovative solutions to our customers. At the same time, it provides a platform for further material development and new applications. With Naerogel®, we are now taking the next step in strengthening our position in the international market,” says Tor Einar Norbakk, CEO of Svenska Aerogel.
