

Maven Wireless signs production agreement with Vexos Inc.

Maven Wireless Sweden AB (publ) has entered into a production agreement with Vexos Inc. a global Electronics Manufacturing Services (EMS) and custom material solutions provider. Vexos has facilities in United States, Canada, Mexico, China and Vietnam.

The manufacturing partnership will initially be supported at Vexos' factory in Vietnam.

"We continue our rapid expansion and growth in the global DAS market - that's primarily why we need to bring in an additional EMS partner to support production of products such as our new Nimbus product for high capacity 5G indoor coverage. Vexos' presence in North America is a significant factor which could be utilised for future localized production in that market.", says Fredrik Ekström CEO of Maven Wireless.

"We are excited to announce our new partnership with Maven Wireless. This collaboration underscores our dedication to providing exceptional value and innovation, and perfectly complements our role as a comprehensive provider of electronics manufacturing and custom material solutions. Working together, we are well-positioned for shared success and to forge a future abundant with opportunities." says Paul Jona, President & CEO, Vexos.
