

QleanAir launches FS 70 Welding - A powerful mobile air cleaner developed for welding and grinding applications

QleanAir AB (publ.), a premium provider of indoor air cleaning solutions, introduces the FS 70 Welding - a powerful, energy-efficient air cleaner designed to minimize the levels of welding fumes and grinding dust in metalworking environments.

Developed through extensive research and in close collaboration with the industry, the FS 70 Welding features multi-stage mechanical filters with high fire classification, ensuring safe, efficient, and cost-effective operation. Its unique filter configuration and modular flexibility address the specific challenges faced by metalworking businesses in their daily operations.

By continuously recirculating and filtering air throughout the workspace, it protects employees and improves air quality considerably in production halls. This makes it ideal where source capture isn't possible or as a complement to existing extraction systems.

Key features of the QleanAir FS 70 Welding:

- **Unique filter configuration:** Multi-stage mechanical filter solution with high fire classification for safe, efficient, and cost-effective operation.
- **High airflow:** Powerful air cleaning for large spaces with constant airflow regulation.
- **Standalone design:** Operates independently of HVAC systems.
- **Flexible and mobile:** Plug-and-play setup with robust wheels and accessory options.
- **Quiet performance:** Low noise levels (30–63 dB(A)).

"Our goal was to develop a flexible solution tailored to the specific conditions of welding and grinding processes in the metalworking industry," says Johan Billing, Product Manager at QleanAir Scandinavia. "FS 70 Welding is based on a unique filter configuration and offers modular flexibility and efficient air cleaning throughout the entire facility, providing an effective alternative when source capture is not possible or as a complement to existing extraction systems."

QleanAir develops flexible air cleaning solutions adaptable to customer needs in the industry. The FS 70 Welding is now launched across Europe.
