

Maven Wireless granted a fifth patent in India

Maven Wireless, a market leader of groundbreaking solutions for wireless coverage, has been granted a fifth patent in India for the patent application "Attaining signal dominance in a DAS"

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique, future-proof and supports all relevant technologies from 2G to 5G as well as blue light services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary technology.

Including the new granted patent, Maven Wireless possesses 74 patents worldwide and has additionally 5 patent applications pending. The new patent in India covers a method performed by a digital DAS to ensure that all mobiles can synchronize and communicate stably over the DAS network regardless of whether 2G, 3G, 4G or 5G technology is used.

This patent supports and protects Maven Wireless' business especially in India and Asia.
