Two more CoreTherm Centers of Excellence have been designated

Urogyn in Bergshamra, Solna, and the Specialist Medical Group in Kalmar (SLG) have been named a CoreTherm Center of Excellence for 2022. Being named CoreTherm Center of Excellence (COE) is proof of a high performance for both the clinic and the staff. At the same time, the clinics' great commitment to provide significant, lasting symptom relief to men with benign prostate enlargement is noted, where treatment with CoreTherm plays a central role in the care.

The CoreTherm Center of Excellence is defined as a clinic that has performed at least 100 CoreTherm treatments in the past year and where factors such as well-organized staff, level of education, experience, treatment routines, optimal equipment and facilities are of great importance for the result. These clinics therefore also have the opportunity to conduct training sessions for new CoreTherm users.

"It is extremely fun that we have another COE in the capital region. Urogyn has in a short time gained a lot of experience and a functioning organization to use CoreTherm. Together with SLG in Kalmar and Capio Urologi in Solna, we now have three centers that with very short waiting times can provide effective treatment for symptoms of an enlarged prostate. They are all three good role models for how modern care should be carried out", says CEO Johan Wennerholm in a comment.
